

The HERMS program can provide two types of reports. One is the data text report which can be printed from the HERMS program. This report can't be copied to the clipboard. The second report is the graphic report. This report can be copied by the clipboard and added a word processor program. Samples of what the graphic reports are shown below.

This HERMS graphic report indicates the amount time it took to traveled to and from the communities within the Phoenix Service Unit. The time in the PIE graph is indicated in percentage and the actual time in hours in located in the legend.

This HERMS graphic report indicates the amount time spent in each community providing a service. The time in the Bar graph is indicated in percentage and the actual time in hours in located in the legend.

This HERMS graphic report indicates the amount time spent in specific programs within the Phoenix Service Unit. The pie chart indicates the top 10 programs by hours spent. The time in the PIE graph is indicated in percentage and the actual time in hours is located in the legend.
